

Dear Customer,

We at Maptech and our Development Centre has come out with a New Product release **Mail@office - Multi Functional Email Server Software** to cater your business critical needs as below. Now you can easily CROSS UPGRADE from any mail server to Mail@Office. Pl find below the reasons to migrate.

## Multi Functional Mail@office

In the office. While Roaming. At Home.

Are you *depressed* at the thought of backing up / archiving of huge mails you have received these years?

Are you *tired* of monitoring your Roaming employees using Gmail or Yahoo mail?

Is your Systems manager *struggling* because he does not have time in managing Mail Server ?

Are you *worried* that upgrading your mail server will necessitate in purchase of Extra Hardware?

Are you *failing* because you are finding it difficult to make your mailing system what you wanted it to be.

**Well that's all about to change... FOR GOOD!**

**Mail@office** , the new affordable lovely product from Maptech It solves all of the problems above, even if you weren't aware of them. And you're also protected by default against future problems that NOBODY even has an inkling of yet. We've made this product, we believe, ten times simpler than in the past (netMailshar).

**Mail@Office - A Solution that Supports your Business goals and budget.**

<b>Cost Efficiency</b>	A completely transparent per-mailbox licensing model enables you to keep down costs by buying only what you need. You do not need to buy CALs, you do not need to pay for hidden costs in order to access certain features and it is neatly described and priced. Flexible Payment Modes for the customers ? Quarterly, Half yearly and Annual. It supports unlimited domains and mailboxes.
<b>Anywhere Email</b>	Mail@office's IMAP and WebMail client empowers roaming and remote users with anywhere-access to their email at office from any internet-connected computer branch anywhere in the world. The WebMail client has an easy-to-use, interface to ensure that users can communicate without complication
<b>Security</b>	Protect your inbox through integrated, Anti virus and Spam protection and SMTP restrictions, Simplified Backup and Recovery features to reduce time, cost and risk.
<b>Better Performance</b>	Multi threaded design enable huge mail traffic to get processed at once, sending and receiving emails made faster.
<b>Easy Administration</b>	Mail@office makes life easy for administrators. Installation procedures made simple and a centralized administration is empowered with LOG Reports of all services (POP/SMTP/FTP) available user wise.

PLUS .....MAPTECH'S 100% SUPPORT GUARANTEE !!
